TIN LABELS

REG. U. S. PAT. OFF.

Carnation Sterilized Evaporated Milk is Cows' Milk reduced to the consistency of cream by evaporating in vacuum and then thoroughly sterilized.

This milk will keep until opened. After opening it will remain sweet several days if kept in a cool, clean place.

KEEP IN COOL DRY PLACE

DIRECTIONS

By adding one part of water to one part of the contents of this can, a resulting milk product will be obtained which will not be below the legal standard for whole milk.

For drinking, cooking and table use, dilute with water as desired.

For ice cream, use two parts of milk with one part water.

For coffee, use milk without reducing.

For infants, dilute with boiled water according to age and strength of child.

Carnation
BRAND

STERILIZED EVAPORATED
MILK
AN UNSWEETENED CONDENSED MILK

The high quality of **Carnation Sterilized Evaporated Milk** is due to the flavor and quality of the fresh milk used in its production as well as to our methods of manufacture. This milk complies with the standard fixed by the United States Government.

KEEP IN COOL DRY PLACE

GUARANTY

This can is guaranteed by Carnation Milk Products Co., to contain no substance but fresh, pure, sweet milk, evaporated to the consistency of cream, and thoroughly sterilized.

TIN LABELS

W. No. 43.

La Leche Condensada Nestlé, obtenida por la condensación de la mejor leche de vaca, sin más adición que azúcar de excelente calidad, se puede emplear ventajosamente en todos los usos de la leche y es la preferida para la alimentación de los niños.

Modo de Emplearla.

Para uso culinario, diluirla en la proporción de una parte de leche condensada en 4 ó 5 partes de agua fría ó caliente. Para la alimentación de los niños emplear para cada comida:

Edad del niño	Cucharadas pequeñas de Leche Nestlé	Cucharadas grandes de agua	Comidas por 24 horas
1a semana ..	$\frac{1}{4}$	1	8
2a " ..	$\frac{1}{3}$	3	7
3a " ..	$\frac{1}{2}$	4	7
4a " ..	$1\frac{1}{4}$	5	7
5a " ..	2	6	7
6a " ..	$\frac{3}{2}$	7	7
5" y 6" ..	$3\frac{1}{2}$	10	6

1 cucharada pequeña = 10 gr. de leche.
1 cuchar. grande = 14 gr. agua.
La leche preparada para una comida no debe utilizarse para la siguiente.
Hacer hervir el agua antes de hacer la disolución.

NET WEIGHT 397 GRAMMES.

REGISTERED TRADE MARK
MARCA REGISTRADA

Nestlé and Anglo-Swiss Condensed Milk Co.
CHAM & VEVEY (Switzerland), & LONDON.

PREPARED IN U.S. AMERICA
BY NESTLÉ'S MILK PRODUCTS, INC., NEW YORK

Nestlé's Condensed Milk is prepared from pure cows' milk. In condensation nothing but water is taken from it and only pure sugar added. It is particularly suitable for feeding infants, being uniform in quality, easy of digestion, and not liable to turn sour.

Directions.

For cooking purposes, dilute 1 part of Condensed Milk in 4 or 5 parts of hot or cold water.

For feeding infants the following directions may be considered as a guide:

Age of Child	Teaspoonfuls of Nestlé Milk	Tablespoonfuls of water	Meals per 24 hours
1st week ..	$\frac{1}{4}$	1	8
2nd " ..	$\frac{1}{3}$	3	7
3rd " ..	$1\frac{1}{2}$	4	7
4th " ..	$1\frac{1}{4}$	5	7
2nd month ..	2	6	7
3rd & 4th ..	$2\frac{1}{2}$	7	7
5th & 6th ..	$3\frac{1}{2}$	10	6

1 teaspoonful = 10 gr. milk.
1 tablespoonful = 14 gr. water.

Any diluted Milk left over must on no account be kept for the next meal. Boil the water before dilution.

Le Lait Condensé Nestlé est obtenu par concentration d'excellent lait de vache additionné de sucre. Ce lait condensé a toutes les qualités du meilleur lait frais, qu'il remplace avantageusement. Il ne tourne pas et convient tout particulièrement pour l'alimentation des bébés.

Mode d'Emploi.

Pour tous usages culinaires délayer 1 partie de lait condensé dans 4 à 5 parties d'eau froide ou chaude.

Pour l'alimentation des enfants, employer pour chaque repas:

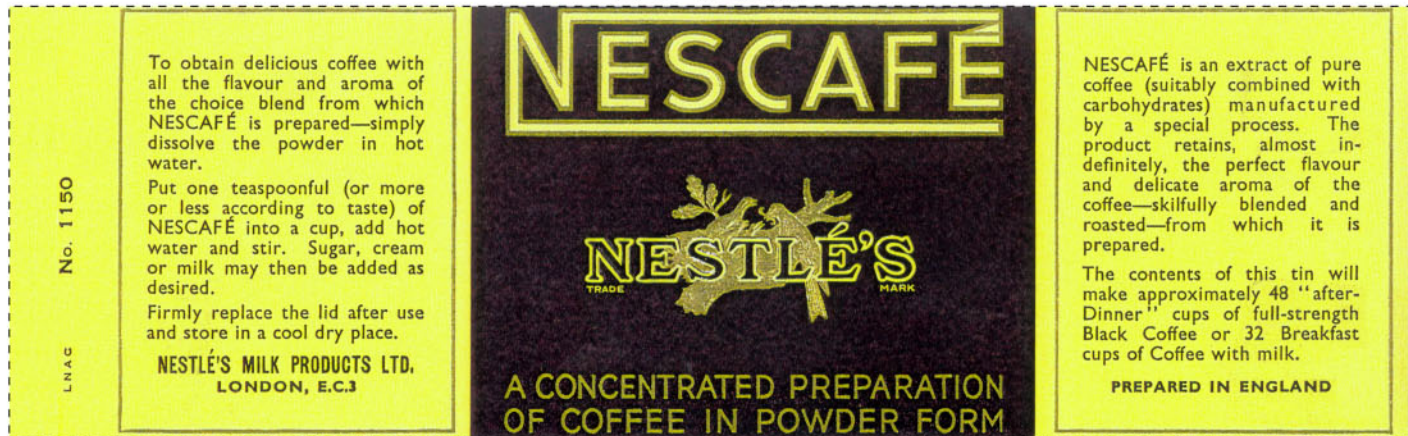

Age de l'enfant	Cuillères à thé de lait Nestlé	Cuillères à soupe d'eau	Repas par 24 heures
1ère semaine ..	$\frac{1}{4}$	1	8
2ème " ..	$\frac{1}{3}$	3	7
3ème " ..	$1\frac{1}{2}$	4	7
4ème " ..	$1\frac{1}{4}$	5	7
2ème mois ..	2	6	7
3ème et 4ème ..	$2\frac{1}{2}$	7	7
5ème et 6ème ..	$3\frac{1}{2}$	10	6

1 cuillère à thé = 10 gr. de lait condensé.
1 cuillère à soupe = 14 gr. d'eau.

Tout lait déjà étendu d'eau, non consommé par l'enfant, ne doit être, sous aucun prétexte, utilisé pour le repas suivant.
Faire bouillir l'eau avant la dilution.
