

## The Negative List

We have identified several materials for which recycling schemes are unlikely to be established. These materials will no longer be used in new product packaging and we will also immediately begin phasing them out from existing packaging.

Material	Application examples
O Polyvinyl Chloride (PVC)	sleeves, labels, films, trays, printing inks, sealing layers
O Polyvinyliden Chloride (PVDC)	PVDC coated bi-oriented Polypropylene (PP) films
O Polystyrene (PS)	trays, yoghurt pots, lids for ice cream cones and coffee cups
Expanded Polystyrene (ePS)	trays, pots, tubs, transport protections and sleeves
Regenerated Cellulose	twist wraps, pack windows
Non-recyclable plastics/paper combinations	paper/plastic laminates, laminated paper cups
